**WHY INVEST?**

The Intrepid International Fund will allow you to take advantage of our philosophy employed for over 20 years and apply it internationally, which allows for a larger universe of investment opportunities with the same goal of achieving strong risk-adjusted returns over full market cycles.

**INVESTMENT OBJECTIVE AND PRINCIPAL INVESTMENT STRATEGY**

The Intrepid International Fund's primary objective is long-term capital appreciation. The Fund seeks to achieve this objective by investing in foreign companies (also referred to as non-U.S. companies) of any size market capitalization. The Fund will invest primarily in developed markets. Equity securities in which the Fund may invest include common stocks, preferred stocks, convertible preferred stocks, warrants, options, Global Depositary Receipts ("GDRs"), American Depositary Receipts ("ADRs"), American Depositary Shares ("ADSs") and exchange-traded funds (ETFs). Currency risk will be mitigated through the use of hedging when cost effective.

**PHILOSOPHY**

We are valuation-driven investors. The International team focuses on businesses that we believe are selling below our calculated intrinsic values, or what we believe the underlying business is worth. Our valuations are calculated by discounting projected free cash flows and valuing assets. We focus on established companies that have strong balance sheets and that generate consistent free cash flows. We attempt to reduce risk through detailed fundamental analysis of a limited number of holdings and by avoiding businesses that cannot be valued with a high degree of confidence. We employ a long-term investment approach focused on absolute results rather than relative performance. By doing so, we attempt to think independently and avoid investment fads. We sell stocks when they exceed our calculated intrinsic value or when there is a decline in company fundamentals that is not yet reflected in the price of the stock. In certain market conditions when we are unable to find attractive discounts, we may determine that it is appropriate for the Fund to hold a significant cash position for an extended period of time. The Fund expects that it may maintain substantial cash positions when we determine that such cash holdings, given the risks we believe to be present in the market, are more beneficial to shareholders than investments in additional securities.

**INVESTMENT DISCIPLINE**

**Independence.**

- ◆ We focus on a business's value, not its changing stock price.
- ◆ We seek to buy only good businesses at good prices, determined by detailed fundamental analysis.
- ◆ We do not chase performance by buying into "hot" sectors or broad market trends.
- ◆ We have a concentrated portfolio consisting of our best ideas.
- ◆ We do not attempt to match our sector weightings to benchmarks.
- ◆ We are flexible and do not have a fully invested (no cash) mandate.

**Integrity.**

- ◆ We produce valuations using realistic assumptions.
- ◆ We generate our research internally.
- ◆ We invest our own money alongside our clients' funds.
- ◆ We will not consider a stock for the fund that we would not consider owning ourselves.

**PERFORMANCE**

	Total Return			Average Annualized Total Returns as of March 31, 2017		
	Qtr.	YTD	1 Year	3 Year	5 Year	Since Inception
Intrepid International Fund - Inv.	0.31%	0.31%	12.92%	-	-	5.38%
MSCI EAFE Net Index	7.25%	7.25%	11.67%	-	-	3.16%
MSCI EAFE Hedged Index	5.02%	5.02%	18.91%	-	-	7.33%

**ANNUAL PERFORMANCE**

	2016	2015
Intrepid International Fund - Inv.	16.71%	-3.99%
MSCI EAFE Net Index	1.00%	-0.81%
MSCI EAFE Hedged Index	6.15%	5.02%

**Performance data quoted represents past performance and does not guarantee future results.** Investment returns and principal value will fluctuate, and when sold, may be worth more or less than their original cost. Performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 866-996-FUND. The Fund imposes a 2% redemption fee on shares held for 30 days or less. Performance data does not reflect the redemption fee. If it had, returns would be reduced.

Per the Prospectus dated January 31, 2017, the annual operating expense (gross) for the Intrepid International Fund-Investor Share Class is 2.50%. The Fund's Advisor has contractually agreed to waive a portion of its fees and/or reimburse expenses until January 31, 2018 such that Net Expense Ratio for the International Fund-Investor Share Class is 1.40%. The Net Expense Ratio represents the percentage paid by investors. Otherwise, performance shown would have been lower.

**GROWTH OF \$10,000 INVESTMENT**

The chart illustrates the performance of a hypothetical \$10,000 investment made in the Fund since the Fund's inception. Assumes reinvestment of dividends and capital gains, but does not reflect the redemption fees.

**Past performance is no guarantee of future results.**

*The Fund's investment objectives, risks charges and expenses must be considered carefully before investing. The statutory and summary prospectuses contains this and other important information about the investment company, and it may be obtained by calling 866-996-FUND. Read it carefully before investing.*

*The Fund is subject to special risks including volatility due to investments in smaller companies, which involve additional risks such as limited liquidity and greater volatility. The Fund is considered non-diversified as a result of limiting its holdings to a relatively small number of positions and may be more exposed to individual stock volatility than a diversified fund. The Fund may invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. The risks of owning an ETF generally reflect the risks of owning the underlying securities they are designed to track, although lack of liquidity in an ETF could result in it being more volatile than the underlying portfolio of securities. ADRs may be subject to some of the same risks as direct investment in foreign companies, which includes international trade, currency, political, regulatory and diplomatic risks.*

Diversification does not guarantee a profit or protect from loss in a declining market.

The MSCI EAFE Index (Europe, Australia, Far East) is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the US and Canada. The MSCI EAFE 100% Hedged to USD Index represents a close estimation of the performance that can be achieved by hedging the currency exposures of its parent index, the MSCI EAFE Index, to the USD, the "home" currency for the hedged index. The index is 100% hedged to the USD by selling each foreign currency forward at the one-month Forward weight. The parent index is composed of large and mid cap stocks across 21 Developed Markets (DM) countries\* and its local performance is calculated in 13 different currencies, including the Euro. You cannot invest directly in an index.

The Price to Earnings (P/E) Ratio is calculated by dividing current price of the stock by the company's trailing 12 months' earnings per share. The Price to Book (P/B) Ratio compares a stock's market value to the value of total assets less total liabilities. Standard Deviation is a statistical measure of portfolio risk used to measure variability of total return around an average, over a specified period of time. The greater the standard deviation over the period, the wider the variability or range of returns and hence, the greater the fund's volatility. Free Cash Flow measures the cash generating capability of a company by subtracting capital expenditures from cash flow from operations. Median Market Cap is the midpoint of market capitalization (market price multiplied by the number of shares outstanding) of the stocks in a portfolio.

The Intrepid Capital Funds are distributed by Quasar Distributors, LLC.
