INVESTMENT OBJECTIVE AND PRINCIPAL INVESTMENT STRATEGY

The Intrepid Disciplined Value Fund's primary objective is long-term capital appreciation. The Fund seeks to achieve this objective by investing in equity securities primarily of small- and mid-capitalization companies. Equity securities in which the Fund may invest include common stocks, preferred stocks, convertible preferred stocks, warrants and foreign securities, which include American Depository Receipts ("ADRs").

PHILOSOPHY

We are valuation-driven investors. The Disciplined Value team focuses on businesses that are selling below what we believe the underlying businesses are worth. We focus on established businesses that have strong balance sheets and that generate consistent free cash flows. We attempt to reduce risk through detailed fundamental analysis, limiting the number of holdings, and by avoiding businesses that cannot be valued with a high degree of confidence. We employ a long-term investment approach focused on absolute results rather than relative results. By doing so, we attempt to think independently and avoid investment fads. We sell stocks when they exceed our calculated intrinsic value or when there is a decline in fundamentals. As bottom up investors, we focus on security selection, in which the decision to buy or sell a particular security is made independently of the presence or absence of investable opportunities among other securities. Therefore, in certain market conditions in which we are unable to find attractive discounts, we may determine that it is appropriate for the Fund to hold a significant cash position for an extended period of time. The Fund expects that it may maintain substantial cash positions when we determine that such cash holdings, given the risks we believe to be present in the market, are more beneficial to shareholders than investment in additional equity securities.

INVESTMENT DISCIPLINE

Independence.

- ◆ We focus on a business's value, not its changing stock price.
- ◆ We seek to buy only good businesses at good prices, determined by detailed fundamental analysis.
- ◆ We do not chase performance by buying into "hot" sectors or broad market trends.
- ◆ We have a concentrated portfolio consisting of our best ideas.
- ◆ We do not attempt to match our sector weightings to benchmarks.
- ◆ We are flexible and do not have a fully invested (no cash) mandate.

Integrity.

- ◆ We produce valuations using realistic assumptions.
- ◆ We generate our research internally.
- ◆ We invest our own money alongside our clients' funds.
- ◆ We will not consider a stock for the fund that we would not consider owning ourselves.

PERFORMANCE

	Total Return			Average Annualized Total Returns as of June 30, 2020			
	Qtr.	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception
Intrepid Disc.Value Fund - Inv.	23.08%	-2.54%	-0.28%	-2.05%	0.86%	5.49%	4.03%

Performance data quoted represents past performance and does not guarantee future results.

Investment returns and principal value will fluctuate, and when sold, may be worth more or less than their original cost. Performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 866-996-FUND. The Fund imposes a 2% redemption fee on shares held for 30 days or less. Performance data does not reflect the redemption fee. If it had, returns would be reduced.

Per the Prospectus dated January 31, 2020, the annual operating expense (gross) for the Intrepid Disciplined Value Fund-Investor Share Class is 1.65%. The Fund's Advisor has contractually agreed to waive a portion of its fees and/or reimburse expenses until January 31, 2021 such that total operating expense for the Disciplined Value Fund-Investor Share Class is 1.30%. The Net Expense for the Disciplined Value Fund-Investor Share Class is 1.32%. The Net Expense Ratio represents the percentage paid by investors. Otherwise, performance shown would have been lower.

GROWTH OF \$10,000 INVESTMENT

The chart illustrates the performance of a hypothetical \$10,000 investment made in the Fund since the Fund's inception. Assumes reinvestment of dividends and capital gains, but does not reflect the redemption fees.

Past performance is no guarantee of future results.

The Fund's investment objectives, risks charges and expenses must be considered carefully before investing. The statutory and summary prospectuses contains this and other important information about the investment company, and it may be obtained by calling 866-996-FUND. Read it carefully before investing.

The Fund is subject to special risks including volatility due to investments in smaller companies, which involve additional risks such as limited liquidity and greater volatility. The Fund may invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. The risks of owning an ETF generally reflect the risks of owning the underlying securities they are designed to track, although lack of liquidity in an ETF could result in it being more volatile than the underlying portfolio of securities. ADRs may be subject to some of the same risks as direct investment in foreign companies, which includes international trade, currency, political, regulatory and diplomatic risks.

Diversification does not guarantee a profit or protect from loss in a declining market.

Prior to April 1, 2013, the Fund's name was the Intrepid All Cap Fund.

The S&P MidCap 400 Index seeks to track the performance of mid-cap U.S. equities, representing approximately 7% of the total U.S. equity market. The S&P MidCap Value Index is float-adjusted, capitalization-weighted index, providing investors with a benchmark of value stocks, with index constituents being drawn from the S&P MidCap 400 Index. The index measures value stocks using three factors: the ratios of book value, earnings, and sales to price. You cannot invest directly in an index.

Standard Deviation is a statistical measure of portfolio risk used to measure variability of total return around an average, over a specified period of time. The greater the standard deviation over the period, the wider the variability or range of returns and hence, the greater the fund's volatility. Beta is a measure of volatility of systematic risk, of a security or a portfolio in comparison to the market as a whole. Free Cash Flow measures the cash generating capability of a company by subtracting capital expenditures from cash flow from operations. Median Market Cap is the midpoint of market capitalization (market price multiplied by the number of shares outstanding) of the stocks in a portfolio.

The Intrepid Capital Funds are distributed by Quasar Distributors, LLC.
