

INTREPID CAPITAL

MANAGEMENT FUNDS TRUST

Intrepid Capital Fund

Institutional Class (Ticker: ICMVX)

Investor Class (Ticker: ICMBX)

Before you invest, you may want to review the Intrepid Capital Fund's (the "Fund") Prospectus, which contains more information about the Fund and its risks. The current statutory prospectus and statement of additional information dated January 31, 2026, are incorporated by reference into this Summary Prospectus. You can find the Fund's Prospectus, reports to shareholders, and other information about the Fund online at <https://www.intrepidcapitalfunds.com/resources/fund-documents/>. You can also get this information at no cost by calling 1-866-996-FUND or by sending an e-mail request to invest@intrepidcapitalfunds.com.

Intrepid Capital Fund

Investment Objective: The Intrepid Capital Fund (the "Fund" in this Summary) seeks long-term capital appreciation and high current income.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.

SHAREHOLDER FEES

(fees paid directly from your investment)

	<u>Investor Class</u>	<u>Institutional Class</u>
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of offering price)	None	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends and Other Distributions (as a percentage of offering price)	None	None
Redemption Fee (as a percentage of amount redeemed on shares held for 30 days or less)	None	None
Exchange Fee	None	None

ANNUAL FUND OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	1.00%	1.00%
Distribution and/or Service (12b-1) Fees	0.25%	None
Other Expenses	<u>0.47%</u>	<u>0.47%</u>
Acquired Fund Fees and Expenses ⁽²⁾	<u>0.01%</u>	<u>0.01%</u>
Total Annual Fund Operating Expenses	1.73%	1.48%
Fee Waiver and/or Expense Reimbursement ⁽¹⁾	<u>-0.32%</u>	<u>-0.32%</u>
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽¹⁾	<u>1.41%</u>	<u>1.16%</u>

- (1) Intrepid Capital Management, Inc. (the “Adviser”) has contractually agreed to reduce its fees and/or reimburse the Fund to the extent necessary to ensure that Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement do not exceed 1.15% of the average daily net assets of each class of the Fund. This expense limitation agreement will continue in effect until January 31, 2027. The Adviser may recoup any waived amount from the Fund pursuant to this agreement if such reimbursement does not cause the Fund to exceed existing expense limitations and the reimbursement is made within three years after the year in which the Adviser incurred the expense. The Fund may have Total Annual Fund Operating Expenses after Fee Waiver and/or Expense Reimbursement higher than these expense caps as a result of any sales, distribution and other fees incurred under a plan adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940, as amended (the “Investment Company Act”), acquired fund fees and expenses or other expenses (such as taxes, interest, brokerage commissions and extraordinary items) that are excluded from the calculation.
- (2) Acquired Fund Fees and Expenses (“AFFE”) are the indirect costs of investing in other investment companies. Total Annual Fund Operating Expenses do not correlate to the expense ratios in the Fund’s Financial Highlights because the Financial Highlights include only the direct operating expenses incurred by the Fund and exclude AFFE.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of these periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (taking into account the contractual expense limitation for one year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Investor Class	\$144	\$514	\$909	\$2,014
Institutional Class	\$118	\$437	\$778	\$1,741

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual

fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 47% of the average value of its portfolio.

Principal Investment Strategies: Under normal conditions, the Fund invests primarily in a diversified portfolio of undervalued small and medium capitalization (*i.e.*, less than \$25 billion of market capitalization) equity securities and high yield securities (also known as "junk bonds"). The Fund believes an equity security is undervalued if the market value of the outstanding equity security is less than the intrinsic value of the company issuing the equity security. Equity securities include common stocks, preferred stocks, convertible preferred stocks, warrants, options, exchange-traded funds ("ETFs") and foreign securities, which include American Depository Receipts ("ADRs").

The Fund considers the intrinsic value of a company to be the present value of a company's expected future stream of free cash flows discounted by an appropriate discount rate. After estimating the intrinsic value of a company, the Fund adjusts for debt, cash, and other potential capital (such as minority interest) on the company's balance sheet. The Fund then makes buy/sell decisions by comparing a company's market value with its intrinsic value estimates. The Fund seeks to invest in internally financed companies generating cash in excess of their business needs, with predictable revenue streams, and in industries with high barriers to entry.

The Fund's investments in high yield securities will not be limited in duration, but typically will be in securities having a duration of two to six years at the time of purchase. Duration is a measure of a debt security's price sensitivity, taking into account a debt security's cash flows over time. For example, a security with a duration of five years would likely drop five percent in value if interest rates rose one percentage point.

Additionally, the Fund's investments in high yield securities will not be limited in credit rating, but typically will be in securities rated below-investment grade by a nationally recognized statistical rating agency. The Fund believes that these securities may be attractively priced relative to their risk because many institutional investors do not purchase less than investment grade debt securities.

In certain market conditions, the Adviser may determine that it is appropriate for the Fund to hold a significant cash position for an extended period of time. The Fund expects that it may maintain substantial cash positions when the Adviser determines that such cash holdings, given the risks the Adviser believes to be present in the market, are more beneficial to shareholders than investment in additional securities.

Principal Risks: There is a risk that you could lose all or a portion of your money on your investment in the Fund. This risk may increase during times of significant market volatility. The following risks could affect the value of your investment:

- **Equity Securities Risks:** Equity securities may experience sudden, unpredictable drops in value or long periods of decline in value. This change may occur because of factors that affect securities markets generally or factors affecting specific industries, sectors or companies in which the Fund invests.

- **General Market Risk; Recent Market Events:** The prices of the securities in which the Fund invests may decline in response to adverse issuer, political, regulatory, market, economic or other developments, and to the negative impact of any epidemic, pandemic or natural disaster that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment or publicity. Securities selected for the Fund's portfolio may decline in value more than the overall stock market.
- **Small and Medium Capitalization Company Risk:** The Fund invests in small and medium capitalization companies that tend to be more volatile and less liquid than large capitalization companies, which can negatively affect the Fund's ability to purchase or sell these securities. Small and medium capitalization companies can be subject to more abrupt or erratic share price changes than larger, more established companies.
- **Value Investing Risk:** The risk associated with the Fund's investment in companies it considers undervalued relative to their peers or the general stock market where these securities may decline or may not reach what the investment adviser believes are their full value.
- **Foreign Securities Risk:** Stocks of non-U.S. companies (whether directly or in ADRs) as an asset class may underperform stocks of U.S. companies, and such stocks may be less liquid and more volatile than stocks of U.S. companies. The costs associated with securities transactions are often higher in foreign countries than the U.S. The U.S. dollar value of foreign securities traded in foreign currencies (and any dividends and interest earned) held by the Fund may be affected unfavorably by changes in foreign currency exchange rates. An increase in the U.S. dollar relative to these other currencies will adversely affect the Fund, if the positions are not fully hedged. Additionally, investments in foreign securities, whether or not publicly traded in the U.S., may involve risks which are in addition to those inherent in domestic investments. Foreign companies may be subject to significantly higher levels of taxation than U.S. companies, including potentially confiscatory levels of taxation, thereby reducing the earnings potential of such foreign companies. Substantial withholding taxes may apply to distributions from foreign companies. Foreign companies may not be subject to the same regulatory requirements of U.S. companies and, as a consequence, there may be less publicly available information about such companies. Also, foreign companies may not be subject to uniform accounting, auditing and financial reporting standards and requirements comparable to those applicable to U.S. companies. Policy and legislative changes in foreign countries and other events affecting global markets, such as the institution of tariffs by the U.S. or the United Kingdom's withdrawal from the European Union, may contribute to decreased liquidity and increased volatility in the financial markets. Foreign governments and foreign economies often are less stable than the U.S. Government and the U.S. economy.
- **Interest Rate Risk:** Generally, the value of fixed income securities will change inversely with changes in interest rates. As interest rates rise, the market value of

fixed income securities tends to decrease. Conversely, as interest rates fall, the market value of fixed income securities tends to increase. This risk will be greater for long-term securities than for short-term securities. Changes in government intervention may have adverse effects on investments, volatility, and illiquidity in debt markets.

- **Debt/Fixed Income Securities Risk:** An increase in interest rates typically causes a fall in the value of the debt securities in which the Fund may invest. The value of your investment in the Fund may change in response to changes in the credit ratings of the Fund's portfolio of debt securities. With interest rates rising in the United States, the Fund may be subject to heightened interest rate risk. Moreover, rising interest rates or lack of market participants may lead to decreased liquidity in the bond and loan markets, making it more difficult for the Fund to sell its holdings at a time when the Adviser might wish to sell. Lower rated securities ("junk bonds") are generally subject to greater risk of loss of your money than higher rated securities. Issuers may (increase) decrease prepayments of principal when interest rates (fall) increase, affecting the maturity of the debt security and causing the value of the security to decline. The United Kingdom's Financial Conduct Authority, which regulates the London Interbank Offered Rate ("LIBOR") has ceased publishing all LIBOR settings. Actions by regulators have resulted in the establishment of alternative reference rates to LIBOR in most major currencies. The impact of the discontinuation of LIBOR and the transition to an alternative rate on the Fund's portfolio remains uncertain. There can be no guarantee that financial instruments that transition to an alternative reference rate will retain the same value or liquidity as they would otherwise have had. These events and any additional regulatory or market changes that occur as a result of the transition away from LIBOR and the adoption of alternative reference rates may have an adverse impact on the value of the Fund's investments, performance or financial condition, and might lead to increased volatility and illiquidity in markets that relied on LIBOR to determine interest rates.
- **Credit Risk:** The risk of investing in bonds and debt securities whose issuers may not be able to make interest and principal payments. In turn, issuers' inability to make payments may lower the credit quality of the security and lead to greater volatility in the price of the security.
- **High Yield Risk:** The risk of loss on investments in high yield securities or "junk bonds." These securities are rated below investment grade, are usually less liquid, have greater credit risk than investment grade debt securities, and their market values tend to be volatile. They are more likely to default than investment grade securities when adverse economic and business conditions are present, such as economic recession or periods of high interest rates.
- **Liquidity Risk:** The risk, due to certain investments trading in lower volumes or to market and economic conditions, that the Fund may be unable to find a buyer for its investments when it seeks to sell them or to receive the price it expects based on the Fund's valuation of the investments. Events that may lead

to increased redemptions, such as market disruptions, may also negatively impact the liquidity of the Fund's investments when it needs to dispose of them. If the Fund is forced to sell its investments at an unfavorable time and/or under adverse conditions in order to meet redemption requests, such sales could negatively affect the Fund. Liquidity issues may also make it difficult to value the Fund's investments.

- **Cash Position Risk:** The ability of the Fund to meet its objective may be limited to the extent it holds assets in cash (or cash equivalents) or is otherwise uninvested.
- **Exchange-Traded Fund Risk:** The risk of owning an ETF generally reflects the risks of owning the underlying securities they are designed to track, although lack of liquidity in an ETF could result in it being more volatile than the underlying portfolio of securities. Disruptions in the markets for the securities underlying ETFs purchased or sold by the Fund could result in losses on the Fund's investment in ETFs. ETFs also have management fees that increase their costs versus the costs of owning the underlying securities directly.
- **Changes in Tax Laws.** Tax law is subject to change, possibly with retroactive effect, or to different interpretations, and such changes or interpretations could adversely affect the Fund. For example, the recently enacted One Big Beautiful Bill Act made significant other changes to the U.S. Internal Revenue Code of 1986, as amended, including permanent reductions to tax rates and disallowance of deductions, that will materially impact funds and their investors. Any future changes are highly uncertain, and the impact on the Fund or its shareholders cannot be predicted. Prospective shareholders should consult their own tax advisors regarding the impact to them of possible changes in tax laws.

Performance: The following bar chart and table provide some indication of the risks of investing in the Fund. The bar chart shows changes in the Fund's performance from year to year for Investor Class shares (the Class with the longest period of annual returns). The table shows how the Fund's average annual returns over 1, 5, and 10 years compare with those of a broad measure of market performance, as well as additional indices that reflect the market sectors in which the Fund invests. For additional information on the indices, please see "Index Descriptions" in this Prospectus. The performance for the Institutional Class shares would differ only to the extent that the Institutional Class shares have different expenses than the Investor Class shares. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund's website at www.intrepidcapitalfunds.com.

Intrepid Capital Fund – Investor Class

Calendar Year Total Returns as of 12/31

During the period shown on the bar chart, the Fund's best and worst quarters are shown below:

Best Quarter	12/31/2020	14.35%
Worst Quarter	3/31/2020	-20.04%

AVERAGE ANNUAL TOTAL RETURNS

(For the periods ended December 31, 2025)

	<u>1 Year</u>	<u>5 Years</u>	<u>10 Years</u>
Investor Class			
Return Before Taxes	13.44%	8.11%	6.32%
Return After Taxes on Distributions	12.47%	7.06%	5.16%
Return After Taxes on Distributions and Sale of Fund Shares	8.00%	5.90%	4.53%
Institutional Class			
Return Before Taxes	13.75%	8.36%	6.57%
Bloomberg Combined 1-5Y TR Index (60% S&P 500 [®] Index/40% Bloomberg US Government/Credit Index 1-5YR TR Index) (reflects no deduction for fees, expenses or taxes)	13.20%	9.36%	9.88%
Bloomberg Combined Index (60% S&P 500 [®] Index/40% Bloomberg US Gov/Credit Index) (reflects no deduction for fees, expenses or taxes)	13.52%	8.37%	9.85%
S&P 500 [®] Total Return Index (reflects no deduction for fees, expenses or taxes)	17.88%	14.42%	14.82%
Bloomberg US Gov/Credit 1-5Y TR Index (reflects no deduction for fees, expenses or taxes)	6.11%	1.56%	2.17%
Bloomberg US Gov/Credit Index (reflects no deduction for fees, expenses or taxes)	6.88%	-0.59%	2.16%

The Fund uses the Bloomberg US Gov/Credit 1-5Y TR Index, Bloomberg Combined Index, and Bloomberg US Gov/Credit Index as additional indices because they compare the Fund's performance with the returns of indices holding investments similar to those of the Fund. For additional information on the indices, please see "Index Descriptions" in this Prospectus.

The Fund offers two Classes of shares. Investor Class shares commenced operations on January 3, 2005 and Institutional Class shares commenced operations on April 30, 2010.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your situation and may differ from those shown. In certain cases, the figure representing "Return After Taxes on Distributions and Sale of Fund Shares" may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor. Furthermore, the after-tax returns shown are not relevant to those who hold their shares through tax-deferred arrangements such as 401(k) plans or Individual Retirement Accounts ("IRAs"). After-tax returns are shown for Investor Class shares only, and after-tax returns for Institutional Class shares will vary.

Management

Investment Adviser: Intrepid Capital Management, Inc. is the investment adviser for the Fund.

Portfolio Manager: Mark Travis has served as the portfolio manager of the Fund since its inception in 2005 and is the President of the Adviser. Matt Parker, CFA®, CPA, Hunter Hayes, CFA®, and Joe Van Cavage, CFA®, have served as part of the investment team of the Fund since 2019.

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to "Purchase and Sale of Fund Shares, Taxes and Financial Intermediary Compensation" on page ##.
